Australia: 769707

Introduction

Dek-King® by Wilks is the ultimate alternative to teak decking and can be easily fitted by the amateur and professional alike. Simply join the Dek-King® strips together using the tongue and groove joint and bond with the Stelmax adhesive to create a continuous area of decking ready to be adhered to your deck.

The material used for Dek-King® is of an outdoor grade PVC that is UV stabilised and contains a colour fast pigment and inbuilt graining effect that is totally convincing and will therefore retain its classic looks for many years. Combined with the integral dark caulking edge and the distinctive black Dek-King® tongue, the result will look like a traditional craftsman laid deck. Dek-King® is fire rated to EN 13501-1:2007.

Profiles

A range of profiles are available all finished with a non-slip surface and a 'Scotchbrite' finished base allowing the adhesive to bond the Dek-King® to the deck securely. Dek-King® can be fixed to almost any surface including GRP, Steel and Timber. Extrusions are generally supplied in 2.25m lengths and 10m coils. 9 x 2.25m lengths will cover 1m², 1 x 10m coil will cover 0.5m². Dek-King® weighs approximately 6kg per 1m².

Colours

In addition to the Traditional teak finish, we can supply certain Dek-King® profiles in a cooler Beige, Grey, Red, White or Blue.

Adhesives

We supply two types of adhesive, Stelmax and Sealtack 750. Stelmax adhesive is used to join the strips of Dek-King® together and is supplied in a 135ml tube that will bond approximately 2m² of tongue and groove joint. Sealtack 750 is a high tack MS-Polymer adhesive used to bond Dek-King® to the required surface and has a shelf life of 15 months in unopened packaging. Sealtack 750 is supplied in 600ml Sausages that will bond approximately 0.6m² of Dek-King®.

How is Dek-King® supplied?

We can supply in four ways:

- Product Only — For the D.I.Y. Installation
- Pre-made Standard Size Mats
- Pre-Fabricated Mats — Supplied ready to fit and made to your template
- Full Fit — Our fitters will fully install your new Dek-King®

We can supply pre-made mats for you to cut your own pattern from. Simply make your template, transfer to the pre-made mat and cut out using a craft knife. The mats are made from WDK 100 and do not include margins.

Pre-Fabricated mats save time and money and still provide a professional job. The individual mats are supplied as per your template and you just adhere them to your deck with the adhesive supplied. We can even template for you if required. For an estimate price, please supply a drawing of the mats required or a full deck plan, with dimensions.

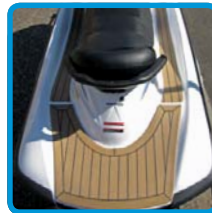

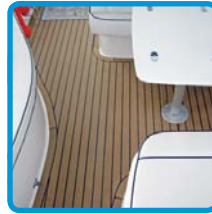

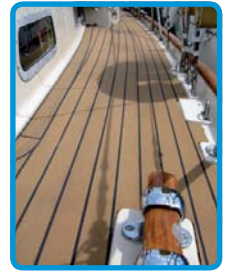

Alternatively one of our Fitters will do everything that you require, from templating to fitting on site.

A fully professional service by our dedicated team...

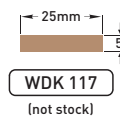

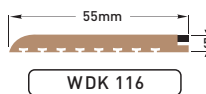

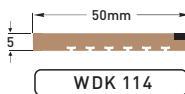

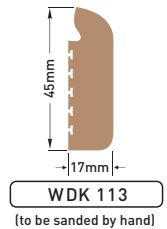

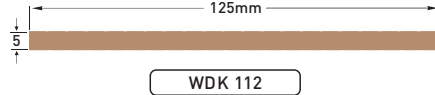

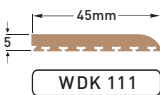

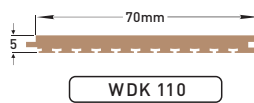

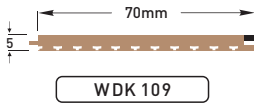

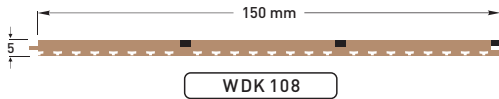

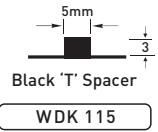

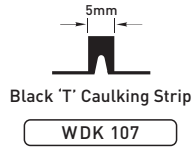

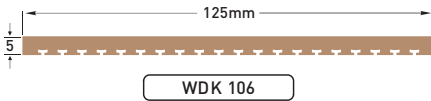

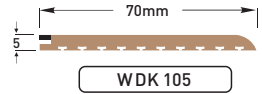

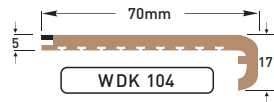

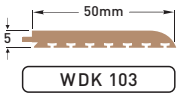

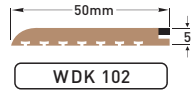

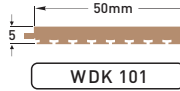

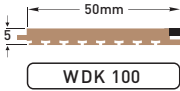

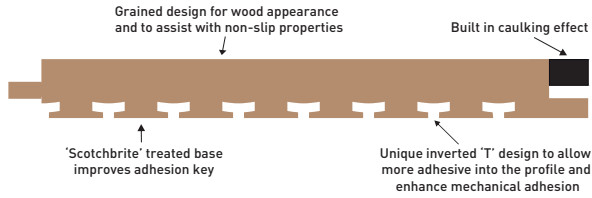

... and don't forget that we also supply Craft Knives, Blades, Dek-King® Cutters, Rollers, Adhesive Spreaders and Adhesive Guns, a one stop shop!

Traditional Range

The *ultimate* alternative to wooden rubbing strakes, handrails and toe rails

- UV Resistant
- Non-marking
- Simple installation
- Low maintenance
- Superior performance
- 100% recycled

Our latest range has been created with the traditional boating materials firmly in mind, thus capturing the beauty of wood whilst removing the maintenance.

Once sanded, the finished appearance of the [Traditional Range](#) produces an attractive woodgrain effect whilst offering all the qualities of PVC to provide the ultimate alternative to wood.

Our [Traditional Range](#) is manufactured from 100% recycled Dek-King®, so not only does it look good and give excellent in-use performance, but it actually reduces the volume of waste taken to landfill.
