

Equestrian Profile Brochure

FLEXITEEK

Beautifully engineered synthetic decking
and marine products.

TRUSTED BY EQUESTRIAN MANUFACTURERS

Wilks is trusted for its protective rub rails and end caps by equestrian studs and horsebox manufacturers across the UK and Ireland.

Wilks fendering and rub rails can be used to furnish major studs and stables. With larger profiles acting as anti-casting strips, in order to help horses regain their balance, with much less chance of injury to themselves or others.

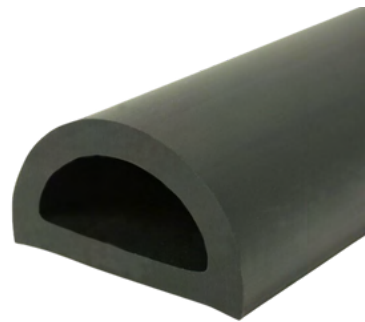

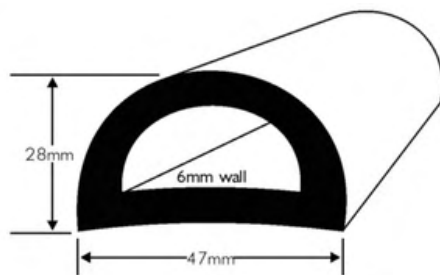

STABLE WALL PROTECTION

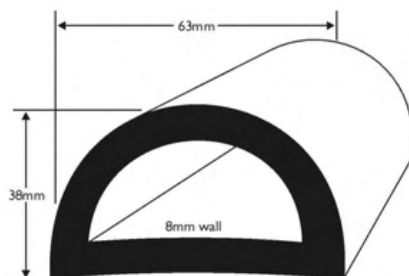

Wilks' 'D' profiles offer an ideal solution for addressing horse casting issues.

When strategically placed on stable walls, our D profiles allows horses to gain traction with their hooves, aiding them in repositioning and standing freely.
